## Dynamis RM 03

Aparat se koristi tako što se u posudu stavlja supstanca pogodna za preparat, na dugmadima se zadaju brojevi prema šifarniku koji koriste homeopate, i držanjem tastera 0/1 oko 3 sekunde uključeno.

Dugmad potencimetara [1] obeležena je brojevima kodova od 0 do 10. Na aparatu **Dynamis RM 03** postoji 9 ovih dugmadi. Dugmad je poređana s leva na desno i odozgo na dole. U prvom redu se nalazi 4, u drugom još 4 dugmeta, dok je u trećem redu još jedno, deveto dugme potencimetara.

Kada unosite kod iz šifarnika, počnete od prvog dugmeta (gore levo) i dalje unosite kodove redom. Ukoliko šifra sadrži manje od devet kodova, ostalu dugmad ostavljate na nuli (0).

U trećem redu se nalaze još:

- Dugme za određivanje **visine potencije** [2] od 1 do 999 (1, 2, 4, 6, 15, 30, 50, 100, 200, 999)
- Dugme za **potencije** [3] od X do LM (X, C, M, MM, M3, M4, M5, LM).
- Pored dugmadi, tu je i taster 0/1 [4] koji, nakon što ste izabrali potenciju i željeni kod treba pritisnuti i držati oko 3 sekunde.

Preparat koji pripremate stavljate u **donju posudu** [5] u plastičnim ili staklenim bočicama. **Gornja posuda** [6] služi za "kopiranje" preparata i u nju stavljate uzorak koji želite da kopirate, s tim što tada dugmad potencimetara za kodove ostavljate na nuli, a podešavate samo dva dugmeta za određivanje potencije.

Kada želite da depotencirate već pripremljen preparat, stavite ga u **donju posudu**, kodove ostavite na nuli, potenciju namestite na LM, a visinu potencije na 999, pritisnete taster 0/1 od 10 do 15 sekundi.

Postojeći prirodni oblici kristali i biološki sistemi oblikuju morfogenetska polja. Iz haotičnog sistema pod uticajem morfogenetskih polja nastaju fraktali, to jest obrasci za formiranje novih oblika. Oni su ujedno u svakom svom najmanjem detalju i nosioci informacija o celini. Aparat u haotičnom sistemu posude stvara morfogenetsko polje i pod njegovim uticajem nastaju fraktali kao obrazac nekog prirodnog oblika. U posudi se morfogenetsko polje nekog oblika prenosi na supstanciju od koje homeopate prave preparat.

1. Potenciometri
2. Dugme za određivanje visine potencije
3. Dugme za potencije
4. Taster 0/1
5. Donja posuda
6. Gornja posuda

**Napomena:** Potenciometri, dugme za određivanje visine potencije i dugme za potencije spadaju u grupu jednoobrnih potenciometara, to znači da se potencijetar okreće u opsegu od početne do krajnje vrednosti i nazad, nikako za pun krug i više.

## Dynamis RM 03

The apparatus is used by pouring the substance adequate for the drug. One presses in the numbers in accordance with the codebook used by homeopaths and holding the 0/1 button for 3 seconds.

The buttons of the potentiometer [1] are marked with code numbers from 0 through 10. There are 9 of these buttons on the **Dynamis RM 03** sequenced from left to right and downwards. The first row of numbers contains 4 buttons, the second row another 4, while there is one (the ninth one) button in the third row.

When one inserts the code number from the codebook, they start from the first button (uppermost left) and thereupon insert the remaining codes in proper order.

Should the code contain fewer than 9 code numbers, then the remaining buttons are to be left at zero (0).

The third row also contains:

- The button for determining the **potency level** [2] from 1 to 999 (1, 2, 3, 4, 6, 15, 30, 50, 100, 200, 999)
- The **potency** button [3] ranging from X to LM (X, C, M, MM, M3, M4, M5, LM)
- Alongside these buttons, there is the 0/1 key button [4] which is to be pressed and held for 3 seconds upon determining the potency and entering the required code number.

The substance should be poured into the **lower container** [5] in plastic or glass vials. The **upper container** [6] is for the purpose of "copying" the substance and therefore the sample that is to be copied is placed in it. At this point, the potentiometer buttons used to enter code numbers are to be left at zero while the buttons determining the potency level are to be defined. When one wants to diminish the potency of a ready-made substance, they place it in the **lower container**, leave the code numbers at zero, set the potency at LM and the potency level at 999, press the 0/1 key button and hold it from 10 to 15 seconds.

The already existent natural forms of crystals and biological systems form morphogenetic fields. The chaotic system influenced by morphogenetic fields produces fractals which are the patterns for the production of new forms. They carry equally in every one of their details information about the whole. In the chaotic system of the container the apparatus creates a morphogenetic field and produces fractals under its influence accordingly to the pattern of a certain natural form. The morphogenetic field of a certain form is then transferred to the substance used by homeopaths to produce the drug.

1. Potentiometer
2. The button for determining the potency level
3. The potency button
4. Button 0/1
5. Lower container
6. Upper container

**Note:** Potentiometers, button for determining the potency level and potency button belong to the group one circular knobs, it means that potentiometer turns ranging from the initial to the final value of the back, and not the full circle and more.
